Art Unit: 3743

## Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 through 8 and 21, drawn to a system or an apparatus for cooling coated semiconductor substrates, classified in class 361, subclass 381+.
- II. Claims 9 and 10 drawn to a system or an apparatus for cooling coated semiconductor substrates using the Joule-Thompson effect, classified in class 62, subclass 514.
- III. Claims 11 through 18, drawn to a method of cooling coated semiconductor substrates through the Joule-Thompson effect, classified in class 62, subclass 51.2.
- IV. Claims 19 and 20, drawn to a method of thermally processing coated semiconductor substrates using heating and cooling, classified in class 165, subclass 80.2+.
- 2. The inventions are distinct, each from the other because of the following reasons:

Inventions III and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus as claimed can be liquid cooled but, unlike the method as claimed, need not rely on the Joule-Thompson effect.

Application/Control Number: 09/707,413 Page 3

Art Unit: 3743

Inventions IV and I are also related as process and apparatus for its practice. In this case, the apparatus as claimed, unlike the method as claimed, can be thermally processed without heating.

Inventions IV and II are also related as process and apparatus for its practice. In this case, the apparatus as claimed, unlike the method as claimed, can be thermally processed using the Joule-Thompson effect.

Claims 10 and 11 link(s) inventions I and III. The restriction requirement among the linked inventions is subject to the nonallowance of the linking claim(s), claims 10 and 11. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Application/Control Number: 09/707,413 Page 4

Art Unit: 3743

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination

purposes as indicated is proper.

4. Also, because these inventions are distinct for the reasons given above and the search

required for Group III is not required for Group IV, for example, restriction for examination

purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an

election of the invention to be examined even though the requirement be traversed (37

CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the

inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently

named inventors is no longer an inventor of at least one claim remaining in the application. Any

amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the

fee required under 37 CFR 1.17(I).

7. Any inquiry concerning this communication or earlier communications from the examiner

should be directed to Ljiljana (Lil) V. Ciric, whose telephone number is (703) 308-3925. While

she works a flexible schedule that varies from day to day and from week to week, Examiner Ciric

may generally be reached at the Office during the work week between the hours of 10 a.m. and 6

p.m. ET.

Art Unit: 3743

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Henry Bennett, can be reached on (703) 308-0101. The fax phone number is (703) 305-3463.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0861.
